Any particular knowledge/experience which you feel may be useful for the position of PEC member:

I have represented members at local level with issues and will continue to represent members within my position on the PEC.

I have attended the TUC on several occasions to represent our members on a wide number of issues which affect our members.

Election Statement

It is now almost two years since the banking crisis first took a hold on the economy. During that time many changes affecting millions of people have encroached onto our lives. A lack of confidence from the upper echelons of Government, to the basic structure of business has been brought into question. It is my opinion as a member of Accord, that now is the time when our membership can really prove to be important.

In these difficult times it is easy to overlook the tremendous steps forward that have been taken over the past few years between the Company and the Unions. We have all worked hard to keep in place the Joint Security Agreement to try to ensure continuity of employment for our members.

Our current and most important aspiration is to ensure the ballot to determine our members feelings concerning the proposed terms and conditions presented by Lloyds Banking Group are an honest representation of the companies aims.

During my last term on the Principal Executive Council alongside my colleagues on the PEC I have ensured our members have a strong voice within the company and with your support I would like to continue in my role.
